

Huapai Triangle Construction Update

We are done!

Construction crews wrapped up all major work on the Huapai Triangle Special Housing Area road infrastructure improvements in November.

The improvements, which include intersection upgrades for SH16 at Station Road and at Access Road, widening and future-proofing part of Station Road, and improved footpaths and cycle-separated lanes, will provide better roads, cycling, and footpath connections to support the growth of the community.

We would like to thank everyone who partnered and engaged with us throughout the project timeline, including local representatives, NZTA Waka Kotahi, Huapai District School, Country Club Huapai and Rodney Local Board. We thank the planning and construction crews for their hard work and dedication in delivering these improvements. Most importantly, we thank the communities of Huapai and Kumeu for your patience these past few months as we carried out these works.

From all of us at Auckland Transport, Fulton Hogan, and our partners, be safe and enjoy!
