

Project Update Summary

Weymouth Road, Friedlanders Road and Wordsworth Road Roundabout

Auckland Transport plans to improve pedestrian safety at the roundabout on Weymouth Road, which intersects with Friedlanders Road and Wordsworth Road.

This letter is to provide you with an update to the project. We are returning to our original 2023 plan of four raised pedestrian crossings at the intersection.

We expect construction to commence in the first quarter of 2025, and further information will be detailed closer to the time.

Safety review of pedestrian crossings

Between September and October 2023, we engaged with the community on the proposed pedestrian improvements at the roundabout. We planned to proceed with raised crossings only on Weymouth Road but have reassessed our approach to speed-calming measures. Upon reviewing this location, we have decided to return to our original plan of a raised crossing on each leg of the roundabout (a total of 4), which has received support from the Manurewa Local Board.

Please see the original and approved design drawing on the next page.

There is no loss of parking or lanes on Weymouth Road and Friedlanders Road. Four parking spaces will be removed on Wordsworth Road to provide appropriate visibility at the new crossing points.

Stay informed of the project

Visit the AT website and search 'Weymouth Roundabout' for more information. You can also email projects@at.govt.nz with **Weymouth Roundabout** in the subject line to receive construction updates.
